

RMIG City Emotion

we make ideas come to life

A colourful work of art

THE FACTS BEHIND AN ARCHITECTURAL LANDMARK

RMIG has supplied 77 individual aluminium panels, finished in bright lime green, for the cladding of Rinkeby Academy, near Stockholm.

- Raw material: Aluminium EN 1050
- Perforation: Individual patterns
- Thickness: 4.0 mm
- Finishing operation: Bending
- Surface treatment: 5-step wash followed by coating in colour NCS S 2070-G70Y exterior quality, both sides
- Architects: Aperto Arkitekturbyggkonsulter AB

we make ideas come to life

THE ARCHITECTS FROM APERTO AIMED TO CREATE SOMETHING SPECIAL FOR FUTURE GENERATIONS OF STUDENTS FROM THE RINKEBY ACADEMY. THE RESULT HAS BEEN CALLED A WORK OF ART.

The Rinkeby School and Academy near Stockholm acts as a cultural focus for the residents of the community. The purpose of the Rinkeby Academy is to provide a bridge between education and business in the area and to help prepare young people for employment. When the building burnt down, it was quickly decided to replace it. Aperto Arkitekturbyggkonsulter AB were asked to design the new building.

Aperto decided to give the new building a distinctive and unique external appearance by cladding it in perforated aluminium panels. This would make Rinkeby Academy stand out and at the same time

improve security and provide protection from vandalism. Furthermore, the perforation would allow plenty of light into the varnished birch plywood classrooms and study areas.

Close collaboration with RMIG

The 77 different types of perforated aluminium panels were manufactured carefully to match the architect's precise specifications. They were given the same treatment and coating on both sides and the edges were bent for securing to the support framework. The result is not only a place of work but also a work of art, with an eye-catching exterior that is colourful, stylish and functional.

project.

MORE THAN JUST BUILDINGS

RMIG City Emotion is for everyone who values the beautiful and innovative qualities of our cities, because a city is not just about buildings. A city is a place for emotion and it requires our full attention to unleash its aesthetic appeal.

RMIG City Emotion captures the passion for creative urban design by offering innovative technologies and materials. We can help you realise the most ambitious architectural projects and their emotional potential.

- Let us guide you through the benefits and practicality of your design
- We can work on your drawings in CAD, 2D and 3D formats
- Use perforated sheets, embossed sheets or expanded metal
- Enjoy the unique finishing operations and surface treatments

RMIG is the world's largest manufacturer and supplier of perforated metal. In addition to exterior cladding, the company also supplies products for a large number of construction applications such as car park and security screening, acoustic wall linings, ceilings, lighting, street furniture, balustrades and walkways.
